PROFILE

First-year Software Engineering student at the University of Sydney with hands-on experience developing responsive educational and Shopify e-commerce websites. Skilled in HTML, responsive web design, Shopify, Generative AI tools, prompt engineering, Microsoft Excel, Canva and Claude Code. Experienced in translating client requirements into functional website features and organising digital content for clear, user-friendly experiences. Seeking internship and entry-level opportunities in software development, web development, cybersecurity and emerging technologies.

PROJECTS

Eleganza Hub | Shopify E-Commerce Website

- Built and configured a Shopify home décor storefront with organised products, collections and navigation.
- Organised product listings to improve browsing and product discovery.
- Customised storefront layouts for a professional, customer-focused shopping experience.
- Applied Shopify e-commerce and store management workflows throughout development.

BrightMindsss | Educational Website

- Designed and developed a responsive educational website for a Grades 6–12 mathematics teacher.
- Organised course content and resources for clear, student-friendly navigation.
- Built a mobile- and desktop-responsive interface.
- Worked directly with the teacher to turn requirements and feedback into website features.
